YOUR LIBRARY, **YOUR CHOICE**

CONNECT & ENGAGE WITH YOUR PATRONS

Facilitate easy access to your library with appIT – the library app from D-Tech enables patrons to access a range of library services, including the ability to borrow & renew books, using only their smart device.

Issue & Deactivate RFID Tags with a smartphone

The huge advantage of appIT, to your library and your patrons, is that it enables your users to issue and deactivate an RFID tag directly from their NFC-enabled phone or smart device.

Forgotten your library card? No problem when you have appIT

appIT allows patrons to scan their library card, storing the barcode within the app, which can then be presented to any barcode scanners within your library – no more fumbling for forgotten library cards.

Empower staff to support patrons

By enabling patrons to manage routine tasks, appIT allows staff more time to focus on invaluable librarian duties and patron interactions.

appIT is easy to set up and manage via a secure online portal, which allows you to control library and app settings and information. Adding new facilities is quick and easy, with the option to copy existing library settings when increasing your estate.

Utilising either barcode or RFID technology, appIT delivers a raft of features, including checkout of items, overview of account, renew items, check library locations and hours of operation. Additionally, the app can be used to engage and communicate with patrons through advertising space and patron messaging.

There were 218 BILLION mobile app downloads in 2020 – a 55% increase on 2016

A fully functioning library app, which allows patrons to access a wide range of library services, on and off-site, helps make the library easily accessible to a new, technologically focused audience.

COMPATIBILITY

As appIT's unique RFID tag reading and deactivation ability utilises NFC (Near-Field Communication), the user's device must be NFC-enabled to enjoy appIT's RFID functions.

appIT RFID functionality compatible with:

- Apple iOS 11 or higher on any NFC-enabled device
- Android Version 5.1 or newer on any NFC-enabled device

appIT Barcode functionality compatible with:

- Any app-enabled smartphone or device with a functioning camera

KEY FEATURES

- Compatible with NFC-enabled Android and Apple devices (See full OS and device compatibility)

- RFID tag reading & RFID security deactivation via NFC (compatible with multiple data models)

- Customer interactions included: display local library address and opening hours, social media and what's on information, message your library, view library adverts and app feedback survey

- Full integration with LMS/ILS

- Barcode scanning via user's smart device camera

- Remember me 'auto login' facility

- Password control

- Customise the appIT front end with your logo

- Control library and app settings via a secure online portal.

SUPPORTING LIBRARIES THROUGHOUT COVID-19

By enabling patrons to access the library via their own device, appIT can help you maximise the services you are able to offer safely throughout the pandemic by reducing the reliance on shared equipment and materials.
