

D-Tech

serveIT™
E SERIES

**SELF-SERVICE
SYSTEM**

d-techinternational.com

D-Tech's serveIT™ e-Series is ergonomic, environmentally friendly and economical with a low power rating; all materials are recyclable, five star rated, energy efficient and use RoHS compliant electronics. Finished in a durable powder coated steel body with attractive styling. A bespoke unit is available in a range of colours on request. The large 19-inch touchscreen allows easy use for the visually impaired with LCD lighting interacting with the software. The e-Series has add on payment modules; chip and pin payments, coin and change giver together with note taker. With its aesthetically pleasing design, the serveIT™ e-Series is an obvious choice for any library.

FEATURES

- Designed and manufactured with a low carbon footprint
- Styled to meet ergonomic guidelines
- Compatible with D-Tech 13.56 MHz RFID labels and items tagged with approved labels from book suppliers including multi vendor reading (MVR), allowing reading of other RFID labels
- D-Tech's advanced digital RFID technology uses state of the art, digitally enhanced software to chip technology to ensure superior reading and writing of labels
- Integrated barcode scanning as standard with the choice of adding biometrics and or Mifare/smart cards for borrower ID
- Software supports multi item issue, returns and renew functions, together with a choice of payment functions from coins, notes, change, e-purse and chip & pin
- Integrated printer included with offline mode, statistics, cash audit, AdminTool network access to change or configure the installed system as standard provision
- Designed to allow staff easy and quick access to all parts including printer paper and coin and note collector. Notes and coins are housed in a secure and alarmed metal enclosure
