

computeIT LITE

Budget-friendly
laptop self-service,
& charging

YOUR LIBRARY, YOUR CHOICE

Our entry-level multi-bay modular locker system, computeIT LITE delivers secure automated device lending from as little as half the required floor space of the parent computeIT range.

The computeIT range is designed to safely store, charge and issue laptops, tablets and other portable devices. Individual user bays are the optimum size to store most makes and models of laptop, netbook, PC tablet or iPads and offer a safe charging environment for access by users of all ages.

Available from 8 bays, up to a maximum of 92 per terminal, the computeIT modular locker system can be tailored to suit end-user requirements. With its steel chassis and doors, computeIT is an extremely secure centralised location to entrust with valued mobile ICT equipment, providing effective crime prevention as well as ICT management.

computeIT is available with a range of charging options. With full independent CE and UL Certification, power to the computeIT unit is entirely safe for customer use and is fully temperature controlled to ensure all devices are kept cool during the charging process.

KEY FEATURES

- Smaller minimum footprint for secure, automated device sharing
- Safe charging and secure storage
- Time-based deployment ensures users never borrow a device with low battery
- Suitable for laptops, netbooks, tablets PCs or any device charged with AC adaptor
- Available from 8 to 92 device loan lockers
- Modular design allowing for additional bays to be added at a later date
- Barcode, Mifare, Biometrics, RFID for user ID
- Network compatible for Data Transfer (optional)
- Thermostatically controlled temperature management system as standard
- LED charge status indicators
- Connection to ILS/LMS via SIP2
- Meets all required Safety Standards and is fully CE, UL Certified
- Many colour options available

OPTIONS

computeIT LITE features either standard fully integrated keyless self-service linked to your ILS/LMS or if no ILS/LMS is available we can supply the unit with its own database. The laptop self-service system delivers an extremely functional access management and control alternative to keys. Our systems are compatible with all ILS/LMS with SIP2. We also provide the unit with user ID readers in barcode, Mifare, RFID and Biometrics Units can also be setup for (BYOD) bring your own device. This allows students or users to rent out a bay with a 240v socket to charge their own Laptops, iPads, phones and cameras.

computeIT LITE is available with a 15" LCD touch screen or with a 10" LCD touch screen in the tablet-only version.

CHARGING CAPABILITIES

Two types of charging are offered; SmartLine™ and PowaSave™. In both cases, the safe power management system ensures all devices are charged simultaneously in the fastest possible time without overcharging, blowing fuses or tripping circuit breakers.

computeIT LITE is available with time-based deployment charging capabilities allowing the end-user to select a set time period between the return and issue of each device, to ensure that users never borrow a device with empty or low battery.

SPECIFICATIONS

Locker tower:

H 1950mm x W 512mm x D 475mm

Weight: 105kg

Tablet tower:

H 1950mm x W 335mm x D 475mm
