serveIT™ R-Series self-service system

serveIT™ R-Series self-service system

D-Tech's serveIT™ R-Series range is a desktop option for times when clients may want to save space, use their own furnishings, or simply like the look and feel of the R-Series. The RFID element provides enhanced protection and throughput where required.

Designed and manufactured with a low carbon footprint, the R-Series simply sits on your counter or desktop. No compromise on performance, integration or functionality and as with all D-Tech products, the R-Series comes with our full support service and 2 year warranty.

Features:

- Compatible with D-Tech 13.56 MHz RFID labels and items tagged with approved labels from book suppliers including multi vendor reading (MVR). Allowing reading of other RFID labels.
- D-Tech's advanced digital RFID technology uses state of the art, digitally enhanced software to chip technology to ensure superior reading and writing of labels with false alarm free protection.
- Integrated barcode scanning as standard with the choice of adding biometrics and or Mifare/smart cards or biometrics for borrower ID.
- Software supports multi item issue, returns and renew functions, together with a choice of payment functions from coins, notes, change, e-purse and chip & pin.
- Printer included with offline mode, statistics, cash audit, AdminTool network access to change or configure the installed system as standard provision.
- Mounts as a "desktop" unit, on to client's suitable furniture or on to D-Tech's 'blend' range of furniture.
