D-Tech receives platinum award in 2016 modern library awards from Library Works

D-Tech, the leader in RFID solutions, is proud to announce they have received a platinum award in Library Works' second annual Modern Library Awards [MLAs.] The MLAs were created to recognize the top products in the library industry in a truly unbiased format. Products were submitted in the fall using a simple application and were then posted on a private site with an enhanced description and attendant materials. These products were batched into small groups and sent to the library database of more than 80,000 librarians at public, K-12, academic, and special libraries. Only customers with experience with these products in their facility were permitted to judge the products, resulting in a truly unbiased score.

Each judge scored the product on a numerical basis from 1-10 on a series of questions regarding functionality, value, customer service, etc.

Mr. Crisp, D-Tech's International President, quoted: "we are excited to receive this award. We pride our company on our customer service and always give our customers excellent value for their money, but to see that our customers found the serveIT™-e Series RFID self-service checkout machine easy to use, and our RFID Security gates stylish is fantastic."

D-Tech's serveIT™ is a new concept with groundbreaking design and technology features. Users have everything they need at their fingertips. Our cost-effective serveIT™ check out range of products gives you all the options you need for an efficient service.

D-Tech has been designing, refining, manufacturing and installing specialized security systems since 2002. Our secureIT™ range of products are the forefront of technology and quality for library security in Europe and the USA.

Their preeminent features are:

- Cost effective
- Easy to use
- Stylish

Jenny Newman, publisher and MLA program manager, said, “it’s hardly a surprise that D-Tech scored so well. They’ve been at the forefront of the industry since their company entered the market.”

D-Tech library security systems use technology to create environments that work for their clients and their customers. We design, develop, manufacture and install high performance RFID products and library security systems. Our technologies include EM, RF, RFIQ and RFID used for self-service, stock control and management, library security, people counters and 24-hour vending. D-Tech also supplies RFID labels and design services to allow libraries to achieve the best from the technologies available today and in the future. D-Tech is currently expanding its global presence to meet the increase in demand internationally for our library RFID systems, products and services in emerging markets. D-Tech continues to develop and improve its product range to create the best in library security systems and RFID library solutions. D-Tech is a family business started in 2002 and since then has grown to become one of the leading manufacturers of library security systems and RFID library solutions in Europe. We are a green company with headquarters, factory and warehousing located on the former US Air Force base of Bentwaters, northeast of London.

About Library Works

Library Works helps administrators to make informed decisions about library technology, automation and software, collection development and management, facilities and furnishings, staffing, purchasing, and other areas that drive effective strategic planning and day-to-day operations. Our family of resources can enable you to identify best practices, monitor trends, evaluate new products and services, apply for grants and funding, post or find a job, and even enjoy some library humor.

About the Modern Library Awards program

Modern Library Awards (MLAs) is a product-review program designed to recognize elite products in the market which can help library management personnel enhance the quality-of-experience for the library user and increase the performance of their library systems.

Please visit us at ALA Midwinter Conference in Boston at booth 1501 where we will have these Platinum Award winning products.
