

lendIT™

SELF SERVICE
LENDING
MACHINE

D-Tech's lendIT™ is the latest product from D-Tech which dispenses items to library patrons anywhere in your service area. This could be in your local hospital, train or bus stations, government office buildings, community centers, malls and shopping centres; locations are only limited by your imagination!

lendIT™ can hold up to one thousand items consisting of books, CDs and DVDs. lendIT™ is available in modules ranging from 200-1,000 items increasing in volume in increments of 200.

lendIT™ is ergonomic and environmentally friendly. Designed and manufactured with a low carbon footprint, the unit is also styled to meet ergonomic guidelines. Its modular design allows for easy add-on options such as payments for usage and/or fines and fees. Special care has been taken to make lendIT™ easy for staff to load and retrieve items returned to the unit.
